- Write-In Candidate.....

Treasurer / Secretary

- Nancy Dendramis
- Katie Roedersheimer
- Write-In Candidate.....

(The candidate receiving the most votes will be treasurer)

Name: _____ Date: _____

Candidate Bios:

Rich Miller

Rich joined CDS Associates, Inc. in 2004 as Director of Transportation Services and was named an Associate in the firm in 2006. His responsibilities as Director include overall responsibilities for the firm's transportation projects, business development, and managing the group staff.

Rich has over 30 years experience in the industry and is a graduate of Northeastern University (BS Civil Engineering). He holds professional engineering registration in multiple states and is a member of the National Society of Professional Engineers. He currently serves on the Transportation Infrastructure Committee for both the Cincinnati and Northern Kentucky Chambers of Commerce, and ACEC of Ohio.

Rich has been active in ASCE since 1974 and active in the Cincinnati Section since relocating here in 2004. He served as the President of the Ohio Council of ASCE in 2007-2008. In 1999 he was named a Fellow of ASCE.

Duncan Patterson

Duncan is a Bridge Engineer with HDR, Inc. Having worked for the company briefly in Pittsburgh and Philadelphia, he has finally settled in Cincinnati. He has been with the company for three years. Prior to that, Duncan graduated with a BS from Michigan State University in 1997, and an MS in 2001 and a Ph.D. in 2004 from Lehigh University.

He has been active with ASCE since joining as an undergraduate, participating with the steel bridge and concrete canoe teams. Duncan continued to be active as a graduate student and now in Cincinnati where he served last year as the section Secretary

Nancy Dendramis

Nancy is a Geotechnical Engineer with H.C. Nutting. She joined the company in January of 2008 immediately after completing her masters at the University of Cincinnati. Her undergraduate degree from Michigan State University is in chemistry. After being at home with three daughters for many years, Nancy worked for the Sycamore School District as an interventionist in both science and math. Once all of the children were out of high school, she decided to take some classes in civil engineering at UC which eventually led to entering graduate school.

She attended the ASCE student group meetings at UC for one year and has attended the local geotechnical ASCE meetings for the last two years in addition to the Cincinnati ASCE meetings that meet one Thursday every month during the school year.

Katie Roedersheimer

Katie recently began her career in civil engineering as a project engineer at Strand Associates, Inc. In May she graduated from the University of Dayton with Bachelor of Science in Civil Engineering and a business administration minor. She hopes to start working towards earning her MBA in the near future.

At the University of Dayton she was involved in many organizations and held leadership roles such as president of Habitat for Humanity, vice president of Society of Women Engineers, and treasurer of ASCE. In 2003 she became an active member of Dayton's student chapter of ASCE. Kate was born and raised in Cincinnati and is extremely excited to be back in town close to her family.
