

The Dayton Section of the American Society of Civil Engineers is hosting its Spring Seminar at The Learning Center at Miami Valley Research Park on Thursday, February 25, 2010.

The Dayton Section has sponsored numerous seminars for engineers and inspectors with excellent participation and results. This seminar will provide professionals in construction inspection with timely information about topics relevant to their career.

Highlights of this year's seminar include sessions on inspection issues related to federally funded projects, job site safety and responsibility, and stormwater inspection driven by new permitting requirements.

We sincerely hope you will take advantage of this business and networking opportunity.

Four Professional Development Hours will be earned by attending this seminar. Please see the agenda and registration form on the reverse, or visit the ASCE website at:
