

October 2018 Newsletter

Orenco Composites

Brady Green with Orenco Composites will be presenting Thursday. Orenco Composites is a division of Orenco Systems®, Inc., headquartered in beautiful Douglas County, Oregon. Orenco Systems has been manufacturing strong, water-resistant fiberglass products for more than 30 years and the company's engineers are nationally recognized experts in the fields of fiberglass product development and manufacturing.

Orenco Composites uses filament winding and two types of closed-molding processes — resin transfer molding (RTM) and vacuum infusion — to produce high quality, fiber-reinforced plastic (“fiberglass”) composite parts. They've taken the fiberglass technology developed for wastewater markets and created high-quality shelters, basins, tanks, and enclosures for telecommunications, utilities, railroad, aviation, food and many more industries.
