LOCATION

Wolf's 1-11
111 Wolf Road
Colonie, NY 12205

COST

- \$40 per person
- \$20 per student

The Mohawk Harbor Project (1 PDH Pending)

Steven Boisvert, PE, and Greg Johnson, PE, from Bergmann Associates, and Fred Dente, PE, from Dente Engineering will discuss the challenges of the design and permitting process of Mohawk Harbor in Schenectady, NY.

When complete, Mohawk Harbor will consist of over 1 million square feet including apartments, condominiums, townhouses, hotels, retail/dining, office space, and the Rivers Casino & Resort Schenectady. Bergmann Associates and Dente Engineering were retained to perform the design of the bulkhead wall for the harbor adjacent to the development. Due to soft native soils and constrained site, the harbor wall used a king pile system with specially shaped H piles and interlocking steel sheets. Design was further complicated by the close proximity of buildings and water level fluctuations on the river and in the harbor. Construction of the harbor occurred during the fall and winter of 2015-2016. The harbor is now complete allowing boat traffic on the Erie Canal to visit the development.
