

Project Civil/Structural Engineer

We are looking to hire an **Associate or Project Civil/Structural Engineer** who embraces new challenges, values being part of a team, and seeks diverse work experience. We will be hiring one position, but are willing to consider candidates matching either job description.

Project Civil/Structural Engineer

JOB SUMMARY

The project civil/structural engineer is a position for a person who has recently become licensed or is ready to take their licensing exams and is taking on more project responsibility. Serves on project teams as a capable and efficient Project Engineer, often making major design determinations under the general direction of the Project Manager.

This is an in-person position with the potential to work from home up to 2 days a week, after a 90-day training period.

TYPICAL DUTIES INCLUDE:

- Is assigned to project teams and works under supervision of a project manager.
- Performs calculations.
- Prepares engineering drawings.
- Prepares reports, opinions, and recommendations for final review by the Project Manager concerning the direction of the project.
- May serve as field staff during construction.
- May have other duties as assigned.

REQUIREMENTS / SKILLS

Education and Professional Experience

- Bachelors degree in Civil Engineering with 5-8 years of experience.
- Associates with 9-12 years of experience.
- Professional engineering license preferred.

Technical Skills

- Proficiency in AutoCAD.
- Proficiency in Revit and/or Civil 3D.
- Proficiency in MS Office (Microsoft Outlook, Word, Excel, and Teams).

Personal Skills

- Ability to work effectively both independently and as part of a team.
- Strong organizational skills, including multitasking and time-management.
- Ability to prioritize and maintain organization in a dynamic environment.
- Ability to meet tight deadlines.
- Personal passion for and commitment to the enduring vitality of historic New England buildings and communities.
- Deep curiosity and creativity, complemented by a drive to solve problems and improve systems and processes.
- Professional demeanor and conduct, exercises good judgment and represents the firm with integrity.

Other Job Requirements

- A valid driver's license.
- A vehicle to access project sites primarily in Windham, Cheshire, and Franklin County.
- Ability to walk on uneven ground of active construction sites.
- Ability to carry up to 25lbs.

EXPECTED SALARY

\$75,000 - \$85,000 annually, plus benefits.
