VTASCE Monthly News and Updates

In February, we were very proud to have our Past-President, Branden Martin, win the Young Engineer of the year to cap off a wonderful Eweek! In March we're excited to offer our first Vermont section of ASCE Lunch and Learn as a way to offer our members an opportunity to learn about exciting projects, network with local professionals and receive a PDH before the June PE renewal deadline.

The most important thing we do as a section is notify civil engineers across the state of legislature that effects our profession so that we can make a difference. The legislature is considering requiring VT Professional Engineers to have 2-hours of continuing education on Vermont state energy goals as part of PE licensing and each relicense in S.220. <https://legislature.vermont.gov/bill/status/2020/S.220> Comment yourself or send comments to jlouisos@mminc.com by March 4.

If you have any ideas to make our chapter better for our members, please provide your input using the comment button below. Also, please follow us on facebook using the icon on the top right.
